

CO₂ – chemical properties

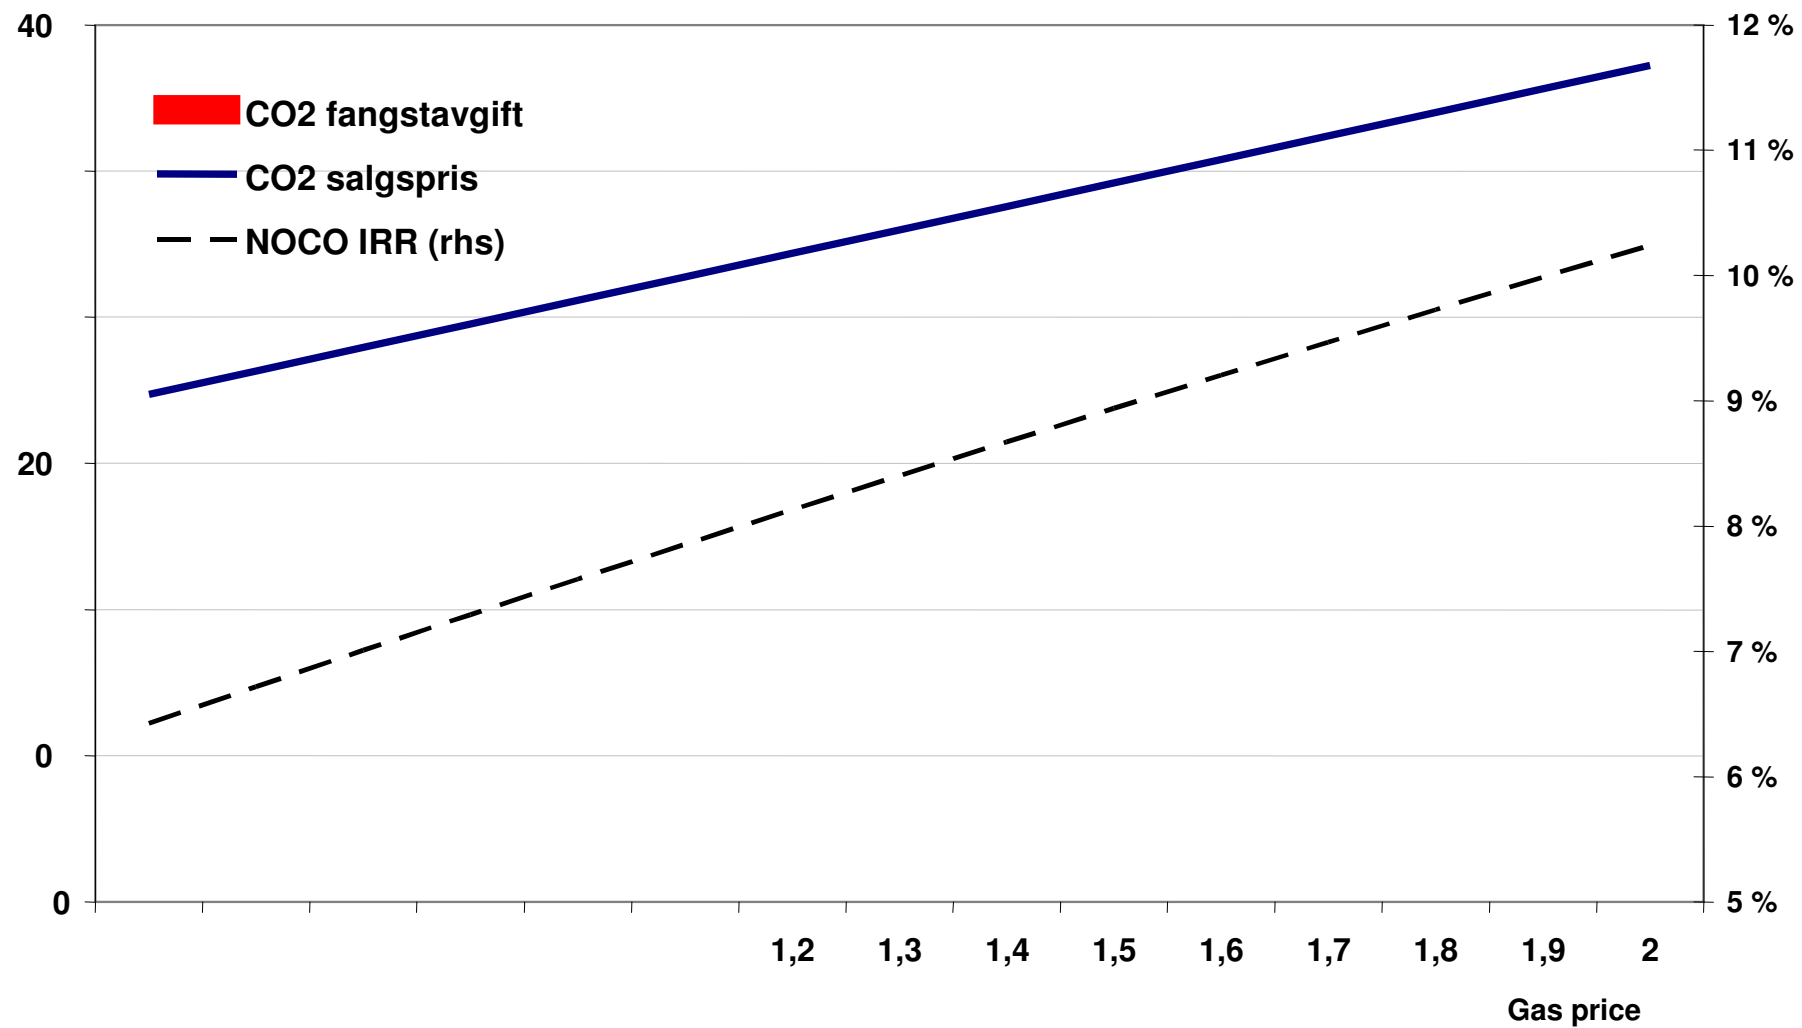

Oil in reservoir, water and CO₂ injection

The CO₂ value chain

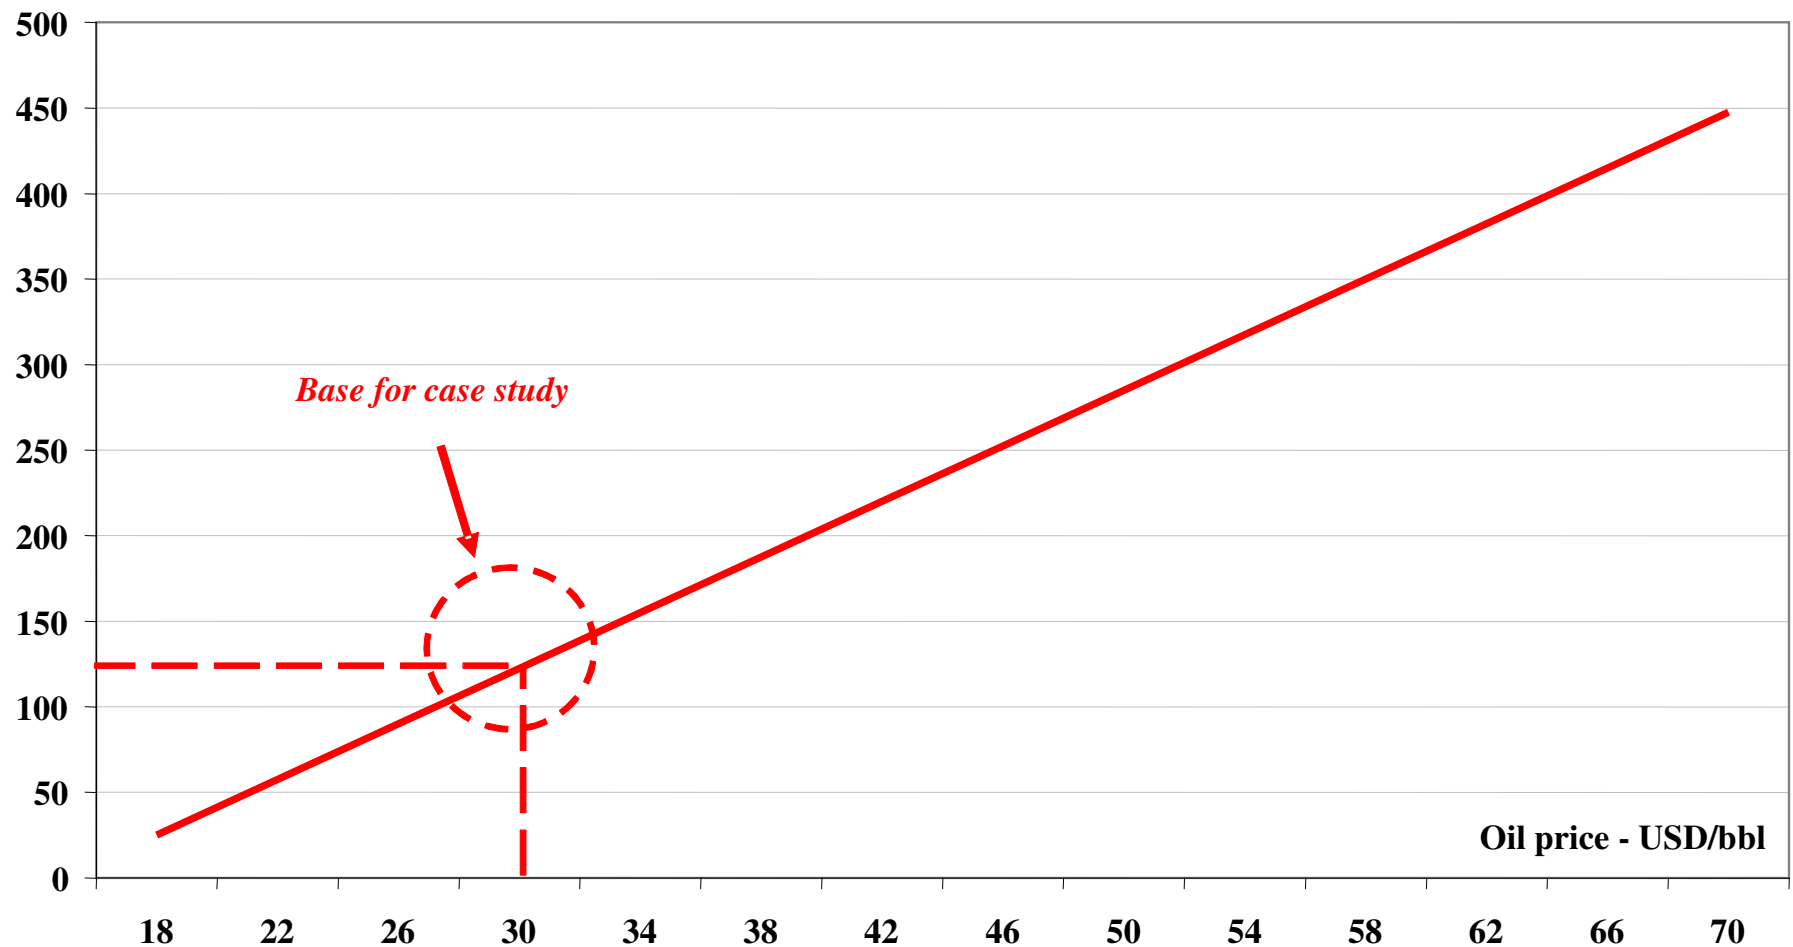

NOCO AS

There is a willingness to pay for CO2 offshore

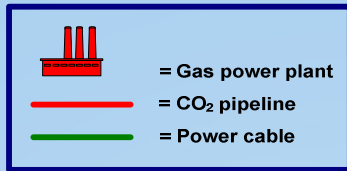

NOK/tonne CO2 delivered

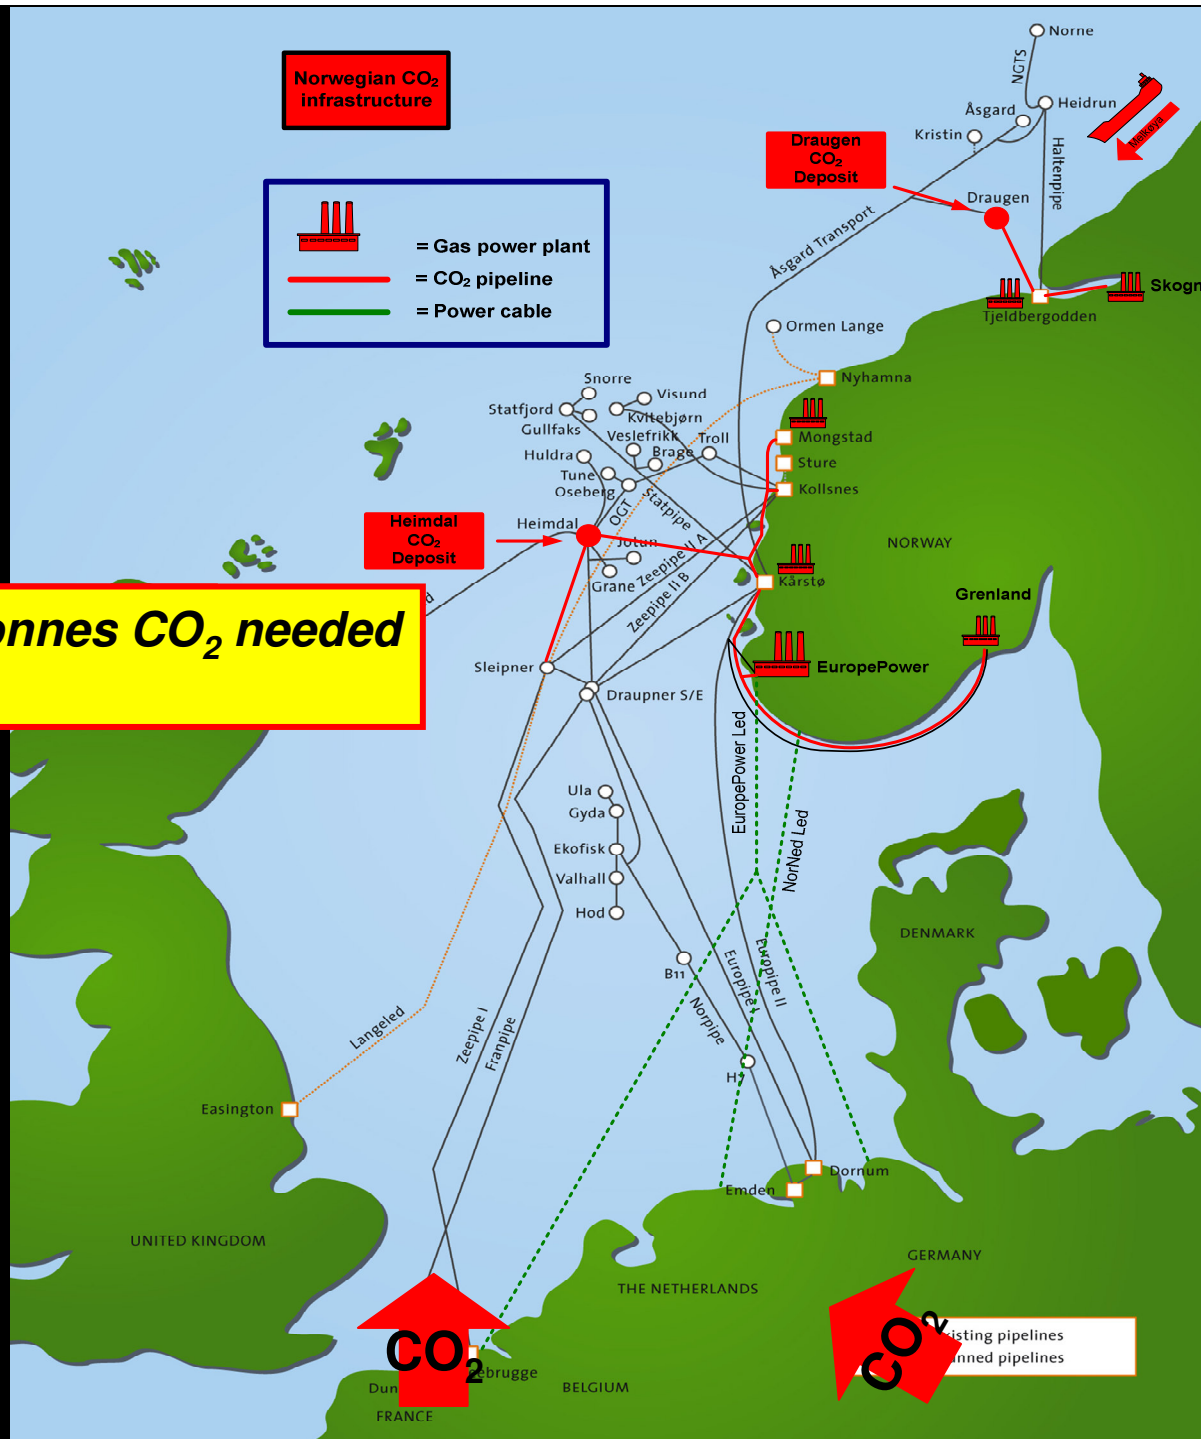

What's in it for Europe?

Norwegian CO₂ infrastructure

175m tonnes CO₂ needed

CO₂

CO₂

existing pipelines
planned pipelines

What's in it for Europe

- The CO₂-value chain should be a European value chain
 - It can provide substantial CO₂ – reductions
 - It is a major step towards zero emission fossil fuel
 - It can contribute to the competitiveness of European industry
- 

What action is needed?

- Long term predictability of climate policy incentives
 - Additional incentives
 - An organized co-operation on infrastructure investments
-
