

CCS in the UNFCCC climate negotiations

Svend Søyland

BELLONA

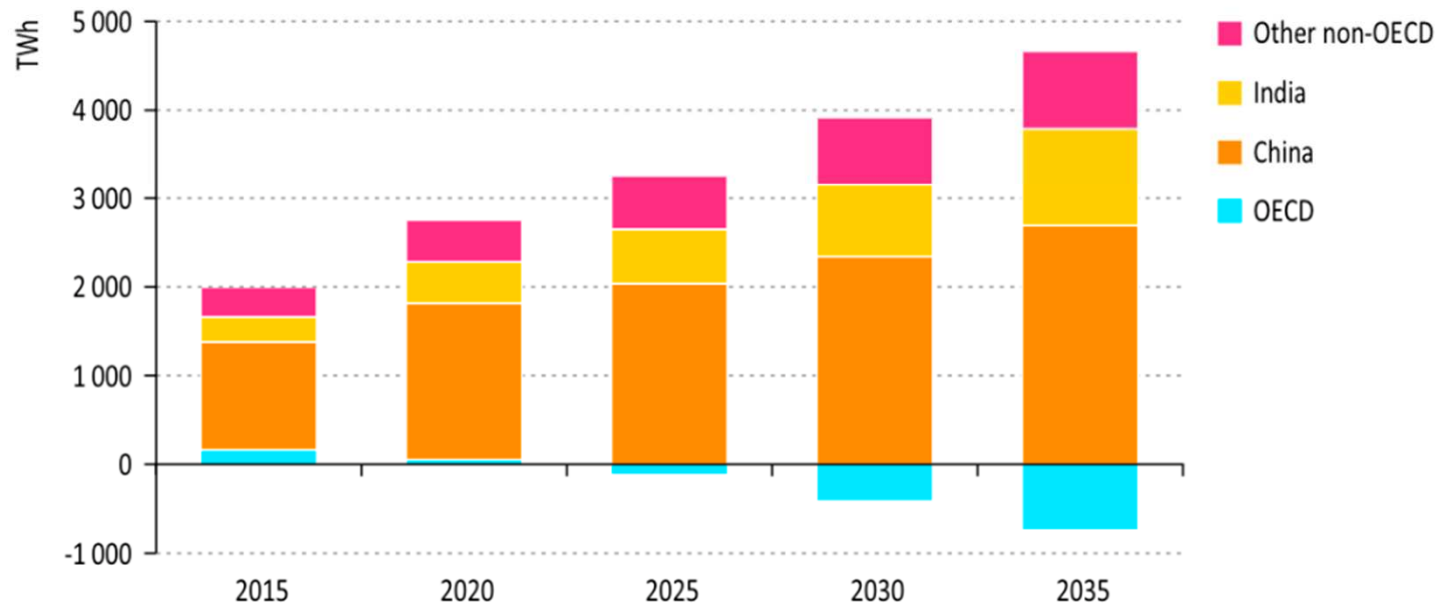

Objections to CCS in CDM

- Too risky – permanence
- Too late
- Displaces renewables
- Displaces smaller projects

BELLONA

Why Global CCS deployment?

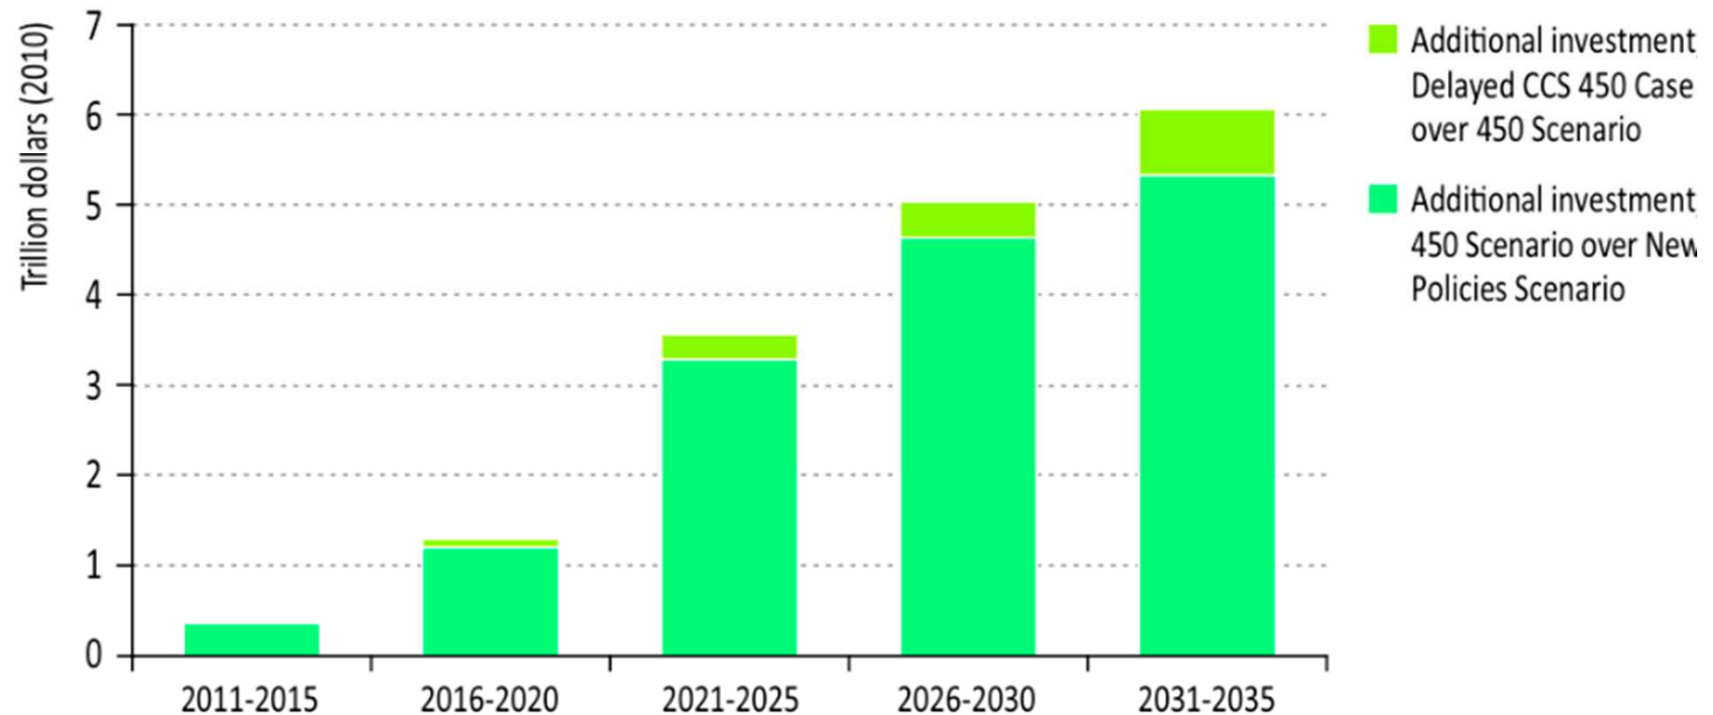

Figure 5.4 ● Incremental global coal-fired electricity generation relative to 2009 by region in the New Policies Scenario

BELLONA

The cost of delay

Figure 6.20 • Additional investment in the Delayed CCS 450 Case

Possible impact of CCS in CDM

- Low cost - Gas venting in Indonesia and EOR
- High cost - additional incentives needed
- Encouragement to utilities and governments
