

ZEP – Skyggegruppemøte

Oslo 20. Juni 2008

Aage Stangeland, Bjørn Utgård
Miljøstiftelsen Bellona

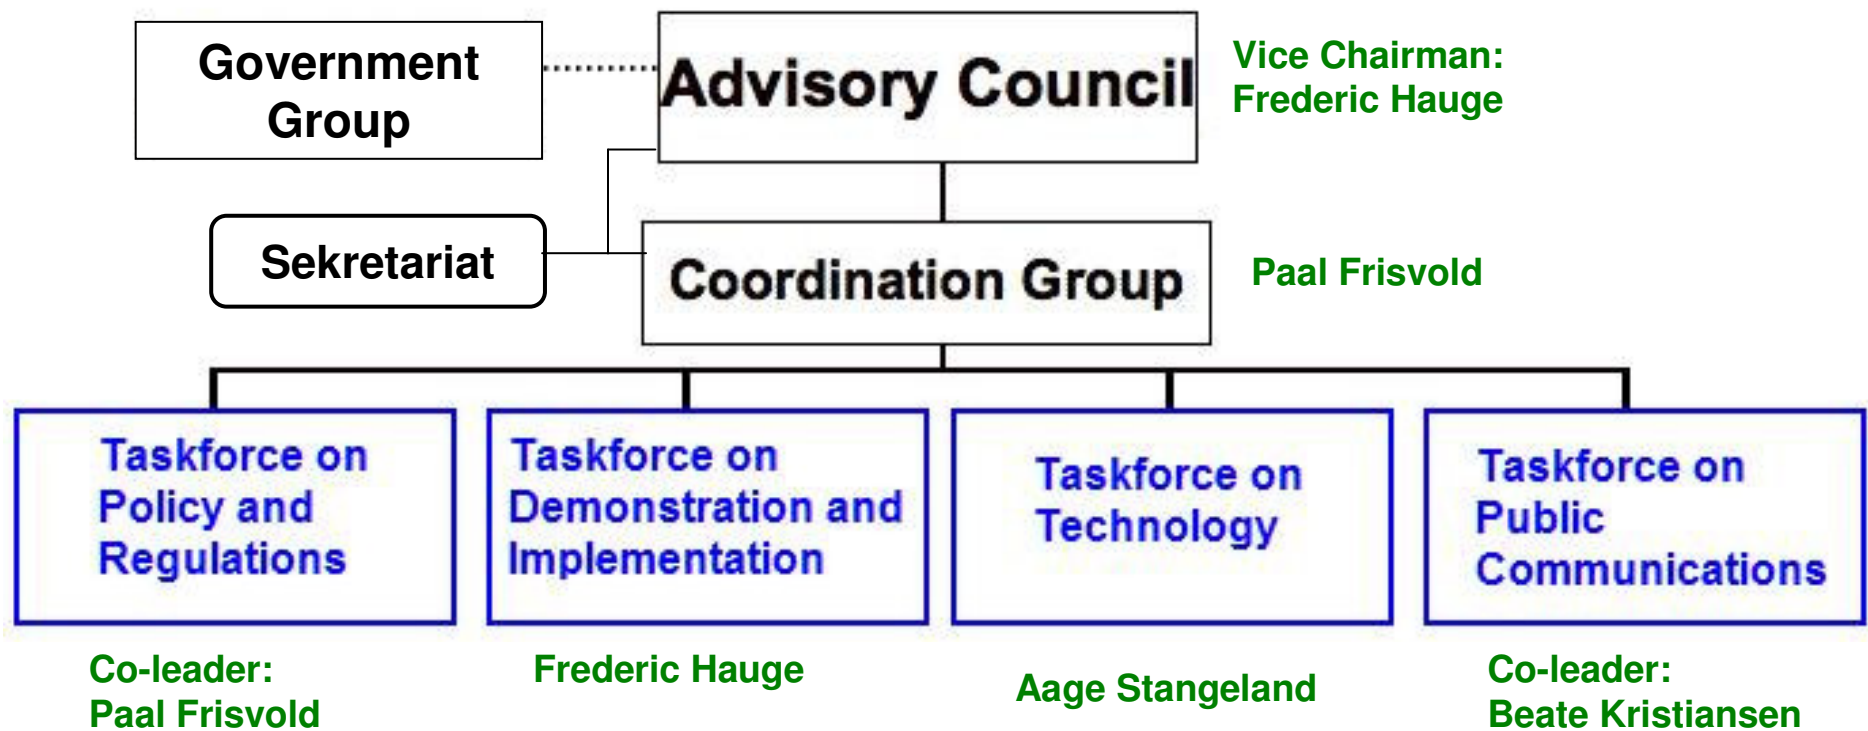

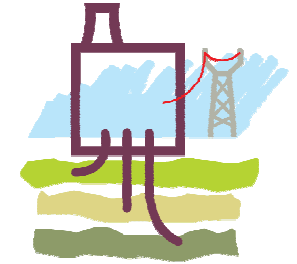

Paal Frisvold, Eivind Hoff
Bellona Europa

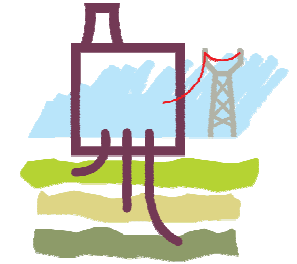

Agenda

- Bellonas arbeid med finansiering av CCS ved Eivind Hoff
- Gruppearbeid
 - I Brussel diskuteres det å gjøre CO₂-håndtering obligatorisk for nye og eksisterende kraftverk innen 2020. Motstanden er imidlertid betydelig. Hvilke argumenter kan vi bruke for å sikre et vedtak om å gjøre CO₂-håndtering **obligatorisk**?
 - EU ønsker å etablere 10-12 demonstrasjonsprosjekter for CO₂-håndtering. Samtidig sier EU at de ikke har budsjett til å finansiere dette. Hvilke **rammebetingelser** må til for å finansiere **demonstrasjonsprosjektene**?
 - Hva er de beste økonomiske insentivene for å **kommersialisere** teknologi for CO₂-håndtering innen 2020?
- 13:30: Hver gruppe presenterer sine konklusjoner
- 13:45: Status for arbeid i Brussel med ZEP, CCS og finansiering ved Paal Frisvold
- 14:00 Sosialt

ZEP - struktur

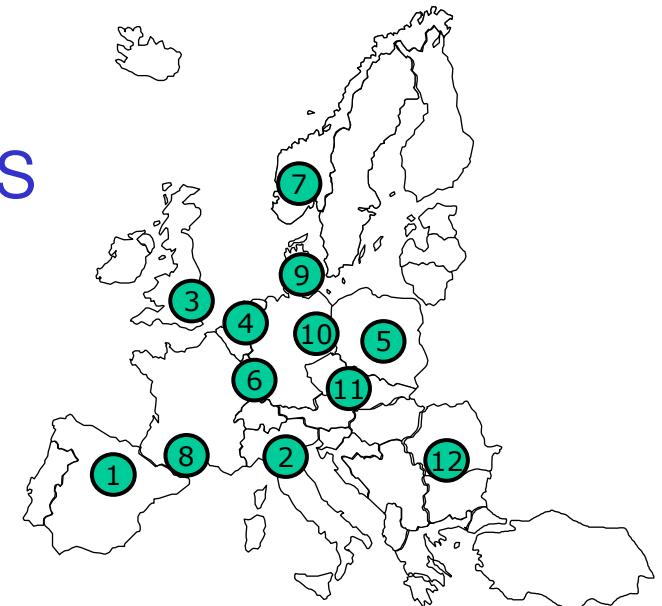

ZEP plans for 2008

- Work closely with EC to ensure establishment of mechanism for supporting early demonstration of CCS
- Establish Financing of Flagship
- Update R&D recommendations
- Public communication

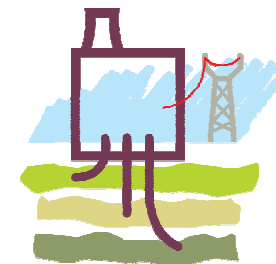

EU Flagship Programme

“a well known coherent set of demo projects spread over Europe”

The Way Forward
